

3: Drawing Circles and Lines with MATLAB, Team, Due January 19, 2010

Bicycle Teams. Plot two circles and two triangles in MATLAB by writing a .m file which contains the appropriate mathematical functions and plotting commands. All figures should appear on one plot.

Swing Team. Plot a stick figure in MATLAB by writing a .m which file contains the appropriate mathematical functions and plotting commands.

All teams should hand in a hard copy of:

- your plot
- your .m file
