

G21 (Team)
Golf-Man Display of Solutions
March 25, 2010

We need to know as soon as possible whether your solutions to your theoretical model are accurate.

- Use your stick figure to help out with this.
- At a particular moment in time, have your stick figure illustrate your α and β values.
- Then make a series of such figures for different times.
- Last step, make a movie out of the figures.
