

G21 (Team)  
Golf-Man Display of Solutions  
March 25, 2010

We need to know as soon as possible whether your solutions to your theoretical model are accurate.

- Use your stick figure to help out with this.
- At a particular moment in time, have your stick figure illustrate your  $\alpha$  and  $\beta$  values.
- Then make a series of such figures for different times.
- Last step, make a movie out of the figures.
