

G8: Powerpoint 1 (Team)  
Due Feb 2, 2010

Create a short powerpoint presentation which includes a title slide and a slide of three golfers and the team's swing machine design. They should be a head on view, the same view being used in your derivations of KE and PE.

Each golfer (the swing machine is now a golfer too) in the presentation should have the basic parameters used in the (your) derivation(s) labeled.
